

I am writing to strongly encourage the FCC NOT to give priority to Low Power FM (LPFM) radio stations over traditional FM affiliates. I am specifically concerned about this since the only FM station that I listen to is K-LOVE (91.3 FM in San Antonio). This is a listener-supported, non-profit station that plays Christian music. I have listened exclusively to K-LOVE over the past 3 years and have been positively impacted by its Positive & Encouraging message. Please do not take this away from my family and I. Thank you.
